## About This Game

The Future is here, but are you ready?...

What happened to you? Why can't you remember? What does everything mean? Using a new experimental virtual reality therapy, maybe you'll know the truth. Stepping into the shoes of a silent amnesiac, you must traverse through the virtual worlds of your own dreams, finding clues that may lead you to the answers of your mysterious past. But, not all is as it seems. There will be many dangers along the way, both in reality and in your own mind. Are you prepared for what you might find in the Dreamscape?

*Welcome To The Dreamscape* is a story driven, first person, puzzle game about trying to learn about your past through your own dreams, but, not all is as it seems. Journey through the amazingly odd world of your own mind and piece together your story.

Game-play involves mostly puzzle solving and narrative, but there are hints of combat and stealth as well.

This was a game created by 14 year old Conner Rush who lives in a small town in West Virginia over the course of 2 years. It's entirely a passion project created through self-taught coding and dedication. We really do hope that you enjoy your experience with *Welcome To The Dreamscape*! Thank you!

British accented narrator, check.

Unexplained circumstances, check.

This is pretty cool but the puzzles at the start are a little tedious and the frame rates were not amazing.

Check it out.

<https://youtu.be/V13RXb-LGNcc>. I don't want to sound like a baby, but...what is the point of stating "Partial Controller Support" when you cannot even use the controller to do anything but walk? That's like having a car with no steering wheel.

[With the aforementioned paragraph in mind, I admit the jumping/platforming parts in this game with keyboard/mouse is a tad frustrating.](#)

[The story/concept is great, but I may not ever play it again because of the jumping/platformer frustration, which is unfortunate because I just want to get past a certain part and cant \(ok now i really sound like a baby, waaaaaah!\).
